

You know where, we know how

250 tons on a 360' trailer

Another transformer for the Conceptum Logistics Houston specialists.

This time it's a 250 tons Transformer with overall dimensions of 13.27 x 3.92 x 4.61 m from Brazil. The final destination is Yuma, AZ

The cargo has been received at the Industrial Terminal in Houston and directly discharged by ships gear to our trailer to spread the weight evenly over the axles, allowing it to move over the road in the United States.

The trailer will need around 3 days just to exit the City of Houston.
