

What do 3 Camels in a car and 9,000 frts of steel have in common?

3 Camels in a car and 9,000 frts of steel

When our colleagues from Conceptum Logistics Hamburg flew to Morocco for a site inspection and kick-off meetings with the customer and local port authorities, they came across this great scene. Fortunately they've been quick enough to take this picture.

Inspired by this amazing method of transportation and with personal un-loading supervision in Laayoune, four stackers and bucket wheel reclaimers with 9,000 frts. plus 100 containers have successfully been delivered.
