

You know where, we know how

### A mobile crushing plant by road, sea and rail to Kazakhstan

For pick up in Tampere, Finland all necessary road permits had to be arranged. Simultaneously a suitable railway platform had to be ordered and a loading scheme to be issued.

Arriving at the Finnish port of Hanko, truck and cargo was shipped by ferry to Paldiski, Estonia for on-carriage by rail to Kazakhstan.

After loading, securing cargo onto the railway car and finally special packaging of all open items by plywood and cartons against damages and stealing, the way was paved for its final destination.
