

You know where, we know how

A ship loader from Turkey to the Ukraine

Despite the political crisis in the Crimea and its conflict between the Ukraine and Russia, Conceptum Logistics successfully operated a full charter shipment of a dismantled ship loader ex Turkey to the Ukraine in May 2014.

With special thanks to our Hamburg based supercargo and our experienced project manager who both were present upon loading, the ship loader fitted well on and under deck and after a very quick one within the Black Sea, the vessel and cargo arrived safe and sound at its destination.
