

You know where, we know how

Almost 6,000 cbm challenging road transport within inner Peru

For Conceptum Logistics Hamburg's on-going mining project at Marcona/Peru, we undertook some challenging inland haulage - 144 pieces of stacker and reclaimer parts, totalling almost 80 truckloads including oversized and heavy ones.

Thanks to the local performance and the supervision through our Peruvian office, the entire operation took just 10 days and underlined again our campaign "you know where, we know how" also for the Peruvian hinterland.

Complying with all health, safety and environmental parameters of the Peruvian mine as well as complying to local road rules and regulations (eg topography accompanying the oversized trailers), all cargo arrived well in time, safe and sound.
