

You know where, we know how

A 42.6 tons heat exchanger from Germany to Mexico

Conceptum Logistics Hamburg moved a heat exchanger and accessories door to door from Germany to Coatzacoalcos in Mexico. Due to its weight and dimensions of 937x395x395cm road studies had to be made and road permits to be organised.

After complex communication with local road and customs authorities and by complying with all local rules and regulations at both ends, the cargo arrived safely and in time.
