

You know where, we know how

[brewing\[at\]conceptum-logistics.com](mailto:brewing@conceptum-logistics.com)

Conceptum's dedicated brewery equipment transport division moved 5,803.89 cbm of brewery tanks with piece weights up to 24 tons and diameter of 5.55m meters from Germany to the US.

Proper transport of these highly delicate and oversized tanks entailed months of rigid logistics planning, which included multi modal transport solutions via truck, barge and ocean vessel.

Units were delivered safely, on time and on budget.
